Contents Volume 215 (1999)

Correlation between pectate lyase activity and ability of diazotrophic *Klebsiella oxytoca* VN 13 to penetrate into plant tissues
G. Kovtunovych, O. Lar, S. Kamalova, V. Kordyum, D. Kleiner and N. Kozyrovska **1–6**

Modeling soil water movement with water uptake by roots
J. Wu, R. Zhang and S. Gui **7–17**

The relationship between silicon availability, and growth and silicon concentration of the salt marsh halophyte *Spartina anglica*
N.V.J. de Bakker, M.A. Hemminga and J. Van Soelen **19–27**

Impact of chemical composition of legume residues and initial soil pH on pH change of a soil after residue incorporation
C. Tang and Q. Yu **29–38**

Sap flow measurements in grapevines (*Vitis vinifera* L.) 1. Stem morphology and use of the heat balance method
P. Braun and J. Schmid **39–45**

Sap flow measurements in grapevines (*Vitis vinifera* L.) 2. Granier measurements
P. Braun and J. Schmid **47–55**

Effect of salinity on growth, water use and nutrient use in radish (*Raphanus sativus* L.)
L.F.M. Marcelis and J. Van Hooijdonk **57–64**

Genotypic variation in response of barley to boron deficiency
S. Jamjod and B. Rerkasem **65–72**

Monitoring plant physiological characteristics to evaluate mine site revegetation: A case study from the wet-dry tropics of northern Australia
S. Schmidt, G.R. Stewart and N. Ashwath **73–84**

Estimating C inputs retained as soil organic matter from corn (*Zea Mays* L.)
M.A. Bolinder, D.A. Angers, M. Giroux and M.R. Laverdière **85–91**

Hydraulic lift among native plant species in the Mojave Desert
C.K. Yoder and R.S. Nowak **93–102**

RECENT PROGRESS IN PLANT NUTRITION
Contributions from an International Colloquium on Plant Nutrition dedicated to Prof. Dr. Dres.h.c. Horst Marschner held at the University Hohenheim, Stuttgart, Germany. February 13–14, 1998

Foreword **iii–iv**

Biochemical and molecular aspects of C/N interaction in ectomycorrhizal plants: an update
R. Hampp, J. Wiese, S. Mikolajewski and U. Nehls 103–113

The significance of ectomycorrhizal fungi for sulfur nutrition of trees
H. Rennenberg 115–122

Relatively large nitrate efflux can account for the high specific respiratory costs for nitrate transport in slow-growing grass species
I. Scheurwater, D.T. Clarkson, J.V. Purves, G. Van Rijt, L.R. Saker, R. Welschen and H. Lambers 123–134

Effect of N concentration and N source on root colonization by *Pseudomonas fluorescens* 2-79RLI
P. Marschner, J. Gerendás and B. Sattelmacher 135–141

Lateral root frequency decreases when nitrate accumulates in tobacco transformants with low nitrate reductase activity: consequences for the regulation of biomass partitioning between shoots and root
M. Stitt and R. Feil 143–153

Modulation of NO_3^- uptake by water-extractable humic substances: involvement of root plasma membrane H^+ ATPase
R. Pinton, S. Cesco, G. Iacolettig, S. Astolfi and Z. Varanini 155–161

Does aluminium affect root growth of maize through interaction with the cell wall – plasma membrane – cytoskeleton continuum?
W.J. Horst, N. Schmohl, M. Kollmeier, F. Baluška and M. Sivaguru 163–174

Fe nutrition demand and utilization by the green alga *Dunaliella bardawil*
E. Keshtacher-Liebson, Y. Hadar and Y. Chen 175–182

Photosystem II efficiency in low chlorophyll, iron-deficient leaves
J. Abadía, F. Morales and A. Abadía 183–192

Physiological responses of wheat genotypes grown in chelator-buffered nutrient solutions with increasing concentrations of excess HEDTA
Z. Rengel 193–202

Expression of high zinc efficiency of *Aegilops tauschii* and *Triticum monococcum* in synthetic hexaploid wheats
I. Cakmak, O. Cakmak, S. Eker, A. Ozdemir, N. Watanabe and H.J. Braun 203–209

Introduction of the reconstructed yeast ferric reductase gene, *refre1*, into tobacco
H. Oki, H. Yamaguchi, H. Nakanishi and S. Mori 211–220

The role of potassium in the secretion of mugineic acids family phytosiderophores from iron-deficient barley roots
T. Sakaguchi, N.K. Nishizawa, H. Nakanishi, E. Yoshimura and S. Mori 221–227

Mechanism of Fe uptake by the leaf symplast: Is Fe inactivation in leaf a cause of Fe deficiency chlorosis?
M. Nikolic and V. Römheld 229–237

Soil erosion and deposition effects on surface characteristics and pearl millet growth in the West African Sahel
A. Buerkert and J.P.A. Lamers 239–253

Volume contents 255–256

Author index 257
